

# Reliable Infrastructure

---

## Expert Guidance for Demanding Environments

The Infrastructure and Enterprise Systems (IES) Practice Group provides strategic guidance, technology planning, and systems design and implementation for organizations of all sizes. We deliver superior infrastructure consulting services by combining technical expertise, best practices, industry partnerships, and more than 20 years of project experience.

The core competencies of the IES practice group include:

- Server Infrastructure
- Messaging Systems
- Data Center Design & Consolidation
- Virtual Desktop Infrastructure
- Disaster Recovery and High Availability
- Server Virtualization
- Network Infrastructure
- Directory Services
- Storage Services

By understanding and routinely working through the challenges associated with infrastructure technology initiatives, our team will help ensure that your technology environment meets or exceeds your requirements. Our consultants work collaboratively with and, where required, augment IT staff to ensure that your projects receive the proper resources and technical expertise.

Kraft Kennedy's IES team works with firms to develop strategies to design, deploy, and maintain a reliable environment, and to ensure that IT systems are ready to perform and will grow to meet the organization's future needs.

For more information on the IES, please contact David Carlson at 212.692.5612.
